

Welcome to SINUS Biochemistry & Electrophoresis GmbH

Quality reagents made in Heidelberg SINUS was founded in 1998 in Heidelberg, Germany, today one of the most established centers in life science research. The company was started with the mission to supply high-quality products to research laboratories. The focus of SINUS products has always been biochemistry, life sciences and bioseparation, i.e. separation of biomolecules by electrophoretic techniques. SINUS serving scientists today: Life sciences undergo rapid changes in technology and methods. It is the task of SINUS to adapt to the changing needs of scientists while maintaining consistently high standards in the supply of quality products. SINUS is known for its range of antibiotics, buffers, dyes, enzymes, media, detergents, pharmaceutical auxiliaries and many other high-quality reagents from A to Z. In a leading position in electrophoresis, particularly in isoelectric focusing, SINUS is a producer of special reagents (SinuLyte carrier ampholytes, SinuTab enzyme tablets and GelGrip films). We at SINUS pledge to continue providing quality products at a fair price, delivered with personalized, responsive service, and supported by years of technical know-how.
